

Team Contract

Team Name: **Group A – Intelligent Agents Development Team**

GOALS: What are our team goals for this project?

What do we want to accomplish? What skills do we want to develop or refine?

Our goal is to successfully deliver the Intelligent Agents Team Project by designing a professional academic proposal for a multi agent AI research assistant powered by a Large Language Model (LLM). The project aims to demonstrate understanding of intelligent agents, multi-agent collaboration, workflow orchestration, and AI based research support systems.

As a team, we aim to:

- Produce a clear, well structured, and academically sound report within the 1,000-word limit.
- Develop a practical system idea called “ResearchMate,” capable of breaking research tasks into smaller actions, retrieving information, summarising findings, ranking sources, and presenting outputs.
- Improve our understanding of intelligent agents, LLMs, workflow design, AI architecture, APIs, and academic research systems.
- Strengthen collaboration, communication, research, critical analysis, and academic writing skills.
- Ensure all team members gain learning opportunities across multiple areas of the project.

EXPECTATIONS: What do we expect of one another in regard to attendance at meetings, participation, frequency of communication, the quality of work, etc.?

As a team, we agree to:

- Attend scheduled meetings where possible and communicate early if unavailable.
- Participate fairly and contribute to agreed deliverables and deadlines.
- Maintain respectful and professional communication throughout the project.
- Review shared documents and provide timely feedback.
- Support one another where assistance or clarification is required.
- Ensure all work submitted is of a good academic standard and properly referenced.

- Keep communication active through the Group A discussion forum and agreed communication channels.

POLICIES & PROCEDURES: What rules can we agree on to help us meet our goals and expectations, such as preparatory tasks, generating ideas, evaluating outcomes?

The team agrees to the following:

- Major project decisions will be discussed and agreed collaboratively.
- Roles and deliverables will be assigned clearly but remain flexible for learning and collaboration purposes.
- Draft work should be completed before agreed review meetings to allow time for feedback and integration.
- Meeting notes and updates will be shared after each session.
- Weekly meetings will be held where possible, with additional ad hoc communication through the Group A forum.
- The team will follow the planned meeting cadence:
 - Meeting 1 – Kickoff & role allocation
 - Meeting 2 – Research & architecture review
 - Meeting 3 – Final integration & review
 - Week 6 – Final approval & submission

ROLES: Which roles do we need in this project and how do we allocate them? Will there be a project lead? Is there a need to rotate roles?

The proposed team roles are:

Team Member	Role	Responsibilities
Frank	Team Lead / Project Coordinator	Coordinate meetings, manage timelines, combine report, proofreading, submission management
Alix	Research Lead / Agent Architecture	Research intelligent agents, define architecture, provide references and diagrams
Mosleh	Technical Implementation & Workflow Design	Identify APIs/tools, workflow design, technical stack, sequence diagrams

Hamad	Technical & Challenges Lead	Identify risks/challenges, mitigations, evaluation and limitation analysis
The team agrees that roles are flexible and members may contribute to other areas of the project for collaboration and learning purposes.		
CONSEQUENCES: How will we address non-performance regarding these goals, expectations, policies and procedures? How do we resolve disagreements?		
How will we address non performance or disagreements? - Any concerns regarding participation or quality of work should first be discussed respectfully within the team. - If a team member is struggling, the group will provide support and clarification where possible. - Repeated non participation without communication may result in redistribution of tasks. - Disagreements will be resolved through discussion and collaborative decision making. - The overall objective is to maintain fairness, professionalism, and successful completion of the project.		

By signing this contract, we confirm that:

- We have participated in formulating these goals, expectations, roles, procedures, and consequences as stated in this contract.
- we agree to abide by the contents of this contract
